"We have been notified of these irregularities in Figure 9. We do not have a clear explanation for them. We have consulted with the publisher and journal. All authors agreed to retract the paper and resubmit without figure 9."

The paper is not related to \$sava or Simuflam. There are likely explanations for how a rectangle could end up behind the film. I guess the authors chose to rerun the experiment. They must be confident the results won't change.

Cognition data. They haven't been able to lay a glove on data. That's all that matters as the primary endpoint for phase 3 trials. Don't get distracted by noise. Cognition data. Outstanding. Collected by multiple independent sites. Cognition. \$SAVA #Bullish In my opinion #ENDALZ
